

Training Program on Inventory and Warehouse Management @ Pune on 24th & 25th Jan 2012

To facilitate the Supply chain activities like procurement, distribution, transportation & storage, the warehouses are designed, strategically positioned and used. Warehouse is the key integrator in Supply chain process, a tool for competitive advantage to maximize service levels. Today's modern warehouses are profit centers rather than traditional storage spaces. More focus on increasing the efficiencies of warehouses are essential due to Warehousing costs contributing 25% to 30% of the total Supply chain costs, increase in number of Third party Logistics Service providers, better utilization of costly space, increased number of SKUs, more JIT requirements, more demanding customers etc., In addition to traditional warehousing functions like picking, packing, cross docking, etc., modern present day warehouses support the supply chain with various value added services. Organizations are striving hard to improve their warehouse turnover and productivity by adaptation of Technology and various techniques. To identify the various techniques and trends to handle effectively Warehousing and Inventory functions, CII -IL is organizing a " *Two days training program on Inventory and Warehousing Management*" on 24th & 25th Jan 2012 @ Pune.

Learning Objectives:

The aim of this Generic training Module is to provide individuals with a deeper understanding of the breadth of problems likely to be encountered by modern warehouses and to offer practical approaches to their solution.

The module is designed to give participants an understanding of the key functions of Warehouse, appreciation of the key characteristics of Warehouse Management Systems, Warehouse activity profiling & zoning that can help in design of Warehouses, appreciation of the main cost and control parameters in Warehouse operations and Logistics. Also, the course provides an insight into inventory Management.

Delivery Mode: Through Power Point Presentations, short Video Clips, Case studies and analysis.

Topics covered:

- ❖ SCM overview & Concepts
- ❖ Inventory Analysis (EOQ, ABC, JIT & Kanban)
- ❖ Inventory Case Study and group activity
- ❖ Ware houses –Types & Functions and beyond storage
- ❖ Warehousing – Technology Considerations (RFID,WMS)
- ❖ Warehousing Optimization,
- ❖ Activity Profiling & Performance Analysis
